

ENVIRONMENTAL POLICY OF THE JOINT STOCK COMPANY «PRODUCTION ASSOCIATION «ELECTROCHEMICAL PLANT» ADMINISTRATION

The JSC «Production Association «Electrochemical Plant» belonging to the Atomic Energy Industrial Complex and being one of the largest producers of enriched uranium and isotopic products, realizes that the Plant activities related to atomic energy facilities utilizing, nuclear materials, radioactive substances and radioactive waste handling can adversely affect the environment and personnel health.

The Administration aims at harmony of the Plant activities and products with the environment with a view to saving it for future generations. Therefore, the environmental protection activity for the purposes of environmental impact minimization, personnel health and environmental protection interests are as important for the Plant as its economic interests.

The objective of the Environmental Policy is provision of the Plant production, facilities and products ecological safety.

In planning and implementing its environmental activities, the Plant will adhere to its following basic principles:

- environmental impact minimization;
- natural resources conservation;
- the Plant activity-related environmental information publicity.

Based on the fundamental environmental policy accepted by the Atomic Energy Corporation «Rosatom», the Plant Administration assumes the following obligations:

- to provide observance of legislative and regulatory requirements regulating the activities in the field of nuclear energy utilization and environmental protection;
- to develop and implement the activities allowing decreasing the production factors negative impact on the environment;
- to improve production processes through the equipment upgrading and environmental safe technologies application;
- to introduce and support the better environmental management methods in accordance with the international environmental management and protection standards.

The Plant Administration incurs the responsibility to implement this policy and undertakes to allocate all necessary resources for this purpose.

The present Policy serves as a basis for setting objectives and goals in the environmental safety area, is implemented in accordance with the Environmental Management System and is obligatory for each Plant employee.

Entered by order no. 1683 of September 11, 2009

Director JSC «Production Association «Electrochemical Plant»

S.V. Filimonov
