

## Quality Policy

The JSC «Production Association «Electrochemical Plant» is an enterprise of the Atomic Energy Industrial Complex, therefore the present Quality Policy establishes the priority of nuclear and radiation safety provision in operating separation equipment.

### **The Policy covers the following activities:**

- production and delivery of enriched uranium based materials, provision of services for separating uranium isotopes;
- production of uranium oxide from uranium hexafluoride with hydrofluoric acid obtained;
- production and delivery of isotope products;
- production and delivery of metal products for nuclear and other industries;
- design, production, assembly and adjustment of electrical and instrumental equipment;
- engineering survey, design, erection, reconstruction and overhaul of capital construction objects including high-hazard, technically complicated and unique facilities.

### **The primary quality objectives are:**

- maximum satisfaction of customers' needs;
- increase of labour productivity;
- reduction of costs at all production stages.

### **To attain the specified objectives the following challenges shall be met:**

- development of the Plant organization;
- improvement of the management processes and the process technology;
- upgrade of the equipment;
- improvement of personnel management.

**The present Policy is implemented through the Quality Management System.**

**The Plant Administration incurs the responsibility to provide compliance of the Quality Management System with ISO 9001 and to increase the Quality Management System effectiveness.**
